

## Other agendas

Social control mechanism

UN Agenda 21 is a worldwide action plan implemented at local level to inventory and control: all land, all water, all minerals, all plants, all animals, all construction, all means of production, all energy, all education, all information, **and all human beings across the world.** Total inventory and control.

“Decisions should be based on environmental impact through three main components: Global Land Use, Global Education & **Global Population Control & Reduction.**”

## Other agendas

Social control mechanism: population reduction

“The present vast overpopulation, now far beyond the world carrying capacity, **cannot be answered by future reductions** in the birth rate due to contraception, sterilization and abortion, but must be met **in the present** by the reduction of numbers **presently existing. This must be done by whatever means necessary.**”
